

# Town of Cumberland, Indiana & Historic National Road

Mark Reynold, President INRA  
President, Cumberland GAP

Cumberland  
GAP

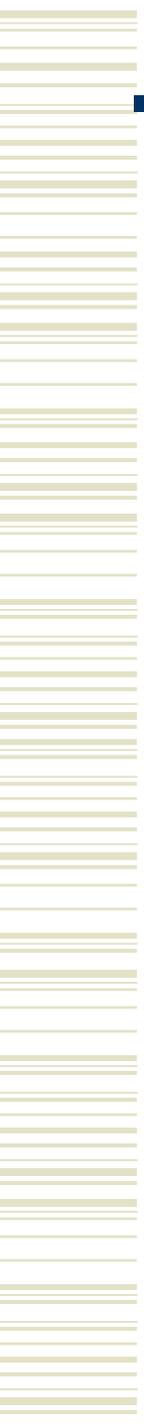

Citizens for Growth and  
Progress

# Project Setting

## Edge of Indianapolis

- ◆ Cumberland Indiana  
pop. 6,000
- ◆ An edge city, a  
formerly small town  
being swallowed up by  
the urban sprawl of  
Indianapolis

---

# Project Setting

## On Indiana's Historic National Road

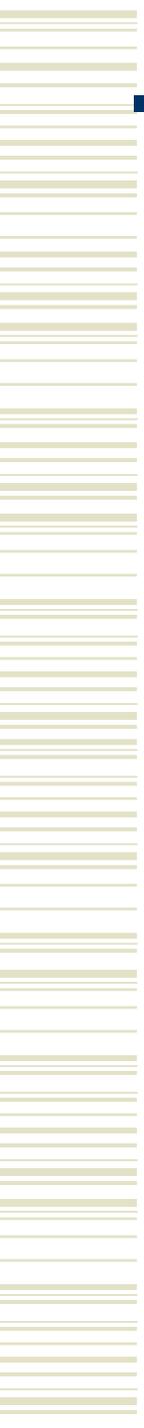

---

- ◆ On the **Historic National Road** a federally designated All American Road, one of America's Byways
- ◆ All American Roads reflect “the best of the best”

# Project Setting

## America's Byways

- ◆ Byways are high profile – they attract attention
- ◆ Byways represent OPPORTUNITIES to do things better or differently
- ◆ They serve as models or prototypes for non-byway projects

---

# Project Problem

Town lacks definition

---

- ◆ Where is the town?
- ◆ No Boundaries, no edges
- ◆ Urban sprawl from Indianapolis

# Project Problem

## Conflicting Needs

Main Street is a Highway

# Project Process

Balancing needs of the DOT  
with needs of the Community

- ◆ Public sometimes not organized
  - Interest groups such as neighborhood organizations not always present
  - If no group is present, create one
- ◆ Public not always able to articulate what they want
  - May not be familiar with the issues
  - May not share a vocabulary

---

# Project Process

Balancing needs of the DOT  
with needs of the Community

---

- ◆ DOT good at designing roads for moving traffic
- ◆ Must recognize that roads have impact beyond moving traffic
- ◆ Must design for those “other” impacts

---

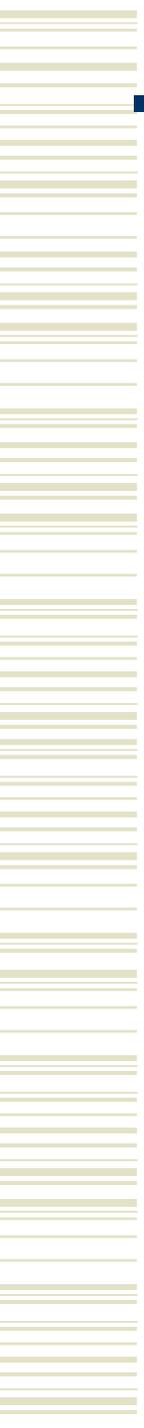

# Project Process

## Community Building

---

- ◆ Historic Landmarks “Top 10 Endangered” list
- ◆ Cumberland GAP was formed
- ◆ INRA became active in the project
- ◆ Town hired Landscape Architecture firm

---

# Project Process

## Design Options Explored

---

- ◆ AASHTO allows for flexibility
- ◆ Thinking Beyond the Pavement
- ◆ National Byway designation provides incentive and funding for context sensitive design solutions

# Project Process Solution

---

# Context Sensitive Solutions

## The Future

---
